01

Strategic Context

Strategic Context

- Business Success Depends On Effective Human Capital

Business Context

- Importance of Compensation Management

- 2 Key HR Drivers of Business Success
 - Differentiated Rewards; and
 - Effective Performance Management
 - Evidence is Clear
 - People Performance = Business Results
 - Top performing companies
 - Provide superior rewards for performance
 - Manage performance well
 - Invest in development
-

Managing Compensation Investment is Critical !

Example : XYZ Company

– Revenues:	£100m
– Total operating expenses:	£90m
– Compensation expense:	£45m
– Profit Before Tax (PBT):	£10m
– Employees :	1,500
– Average comp/employee:	£30,000
– +/-10% numbers/costs:	+/-45% PBT

02

Design Considerations

What is “Pay for Performance”?

“An approach to linking elements of the total remuneration package to the achievement of specified performance outcomes”

What should We Pay For? #1

- Job Size & Responsibilities
 - Salary - linked to external market rates
 - Spot Rates – e.g. €20k for bank tellers
 - Salary Ranges – e.g. €16k - €24k
 - Age/Service
 - Salary increases over time
 - Incremental scales – e.g. 12 points on scale
 - Plus 1 point for every year of service
-

What should We Pay For? #2

- Skills and Competencies
 - Salary increases with growth in capability
 - Performance
 - Company
 - Division
 - Business Unit
 - Team/Function
 - Individual
-

Pay for Performance

- Which elements? #1

- Salary
 - Progression up a salary range
 - Stronger performers get bigger increases
 - Speed of progression
 - Ultimate position in salary range
 - Bonus Awards
 - Size of “pot” linked to Co. performance
 - Individual award based on personal rating
 - Incentive Awards
 - Usually linked to predetermined targets
-

Pay for Performance

- Which elements? #2

- Stock Programmes
 - Profit Sharing Schemes
 - Portion of profit allocated to fund profit shares
 - Usually applies to all eligible staff
 - Same basis for all – e.g. 5% of base salary
 - Stock Options
 - Option to acquire stock in the future at today's market price
 - Generally reserved for senior management
 - Long Term Incentive Plans
 - Typically deferred stock grants
-

Design Objectives

- How much to pay?

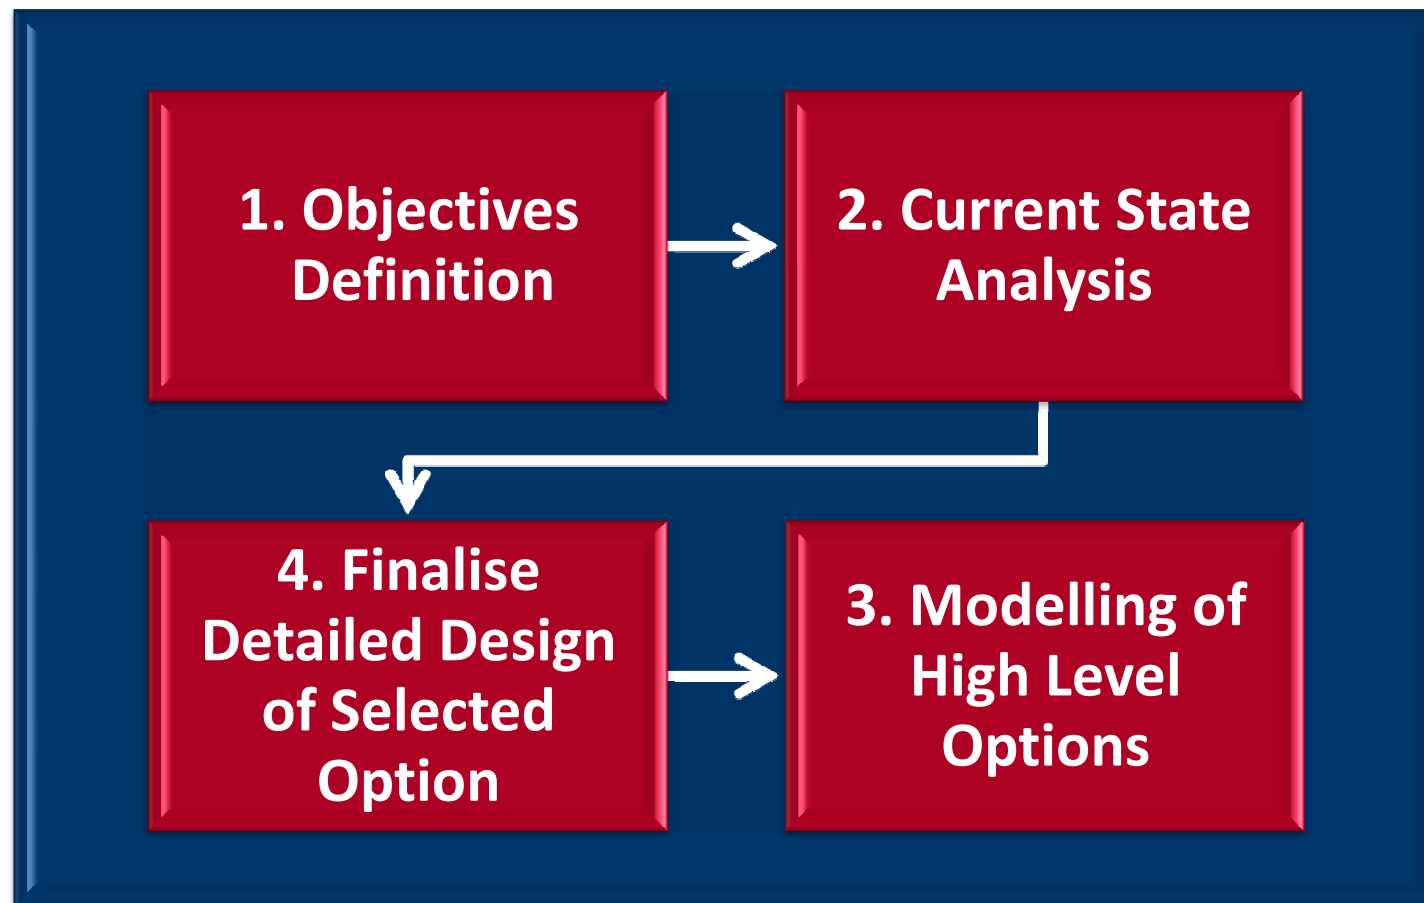

- Policy on Target Market Position
 - How do we want to compare to the external market in which we compete for talent?
 - Salary ranges at Market Median (M)?
 - Total cash at Upper Quartile (Q3)?
 - Overall Cost Parameters
 - How will we ensure that any additional costs of PRP are self-funding?
 - How will our design help to maximise our return on payroll investment?
-

Our Approach

Effective Design

- Our Approach

Assessing your Design

The “ABCP” System

- **Adequacy**
 - Is it enough?
 - **Budget**
 - What can the business afford?
 - **Competition**
 - How do we want to compare?
 - **Perception**
 - Will this motivate staff to deliver results?
-

04

Benefits for Company and Individual

Benefits for Company

A well designed PRP structure will deliver:

- Sensible grading and salary structures
 - Market based, competitive salary ranges
 - Stronger support for business objectives
 - Direct links to achievement of key business and financial objectives
 - Performance culture
 - Strong performers get higher salaries and incentive awards
 - Increased ROI on payroll investment
 - Greater control over payroll expense
 - Additional costs are self-funding
-

Benefits for the Individual

- What's in it for me?

A well designed PRP structure will deliver:

- Win, Win
 - Higher earnings opportunity for all
 - Higher salaries
 - Larger increases & quicker range progression for consistently strong performers
 - Increased variable earnings opportunity
 - For achievement of balanced scorecard targets
 - Greater control and transparency
 - Opportunity to influence my salary & bonus awards
-

05

Lessons Learnt

Lessons Learnt

- Document desired performance outcomes
 - Company; Team; Individual
 - Ensure optimal balance of reward components
 - Salary; bonus/incentive; stock; benefits
 - Avoid “paying on the double”
 - Deliver significant differentiation in awards
 - Maximise “line of sight” for participants
 - Careful modelling to maximise ROI
 - Rigorously test options and outcomes!!
 - Robust performance management is critical
 - PRP demands ability to measure performance in a clear, objective and defensible way
-

Summary

Summary

- Everything starts with objectives!!
 - Clearly define desired performance outcomes
 - Strategic implies continuing approach
 - Review and modify components in context of business and compensation objectives
 - Piecemeal design implies waste
 - Examine impact of changes to individual components on total reward architecture
 - Comms & change management are critical
 - Engage stakeholders throughout the design effort
-
